H2 1

H3 1 1

H3 1 2

First very important paragraph.

And now a very long paragraph that gets split across two lines.

Reference to section H2 1 on page: 1

Reference to figure: Figure 1: Fractal broccoli

Reference to table: Table 1: My sample table

An [external link](#) with custom text.

Raw external link: https://commons.wikimedia.org/wiki/File:Fractal_Broccoli.jpg

Mathematical equation:

$$\frac{x = \sqrt{1+1}}{2}$$

Code block: there is no built-in way. One option is to create your own style:

```
int main() {
    puts("hello world");
}
```

And another:

```
def main:
    print('hello world');
```

Figure 1: Fractal broccoli

I like broccoli. And I **love** fractals.

A list:

- item 1
- item 2
- item 3

A table:

Table 1: My sample table

This is a **very nice** sample table.

Header 1		Header 2	Header 3	
Item 1 1		Item 1 2	Item 1 3	
Item 2 1		Item 2 2	Item 2 3
